General description.

T. 27 N., R. 7 W. is all Grand Prairie,
with the exception of a single grove con-
taining about 80 Acres of excellent tim-
ber. The stream passing through it
empties into the Iniquois, in the Township
immediately North. Its water is remark-
ably clear, cold & pure, the deep holes are
filled with large fish. It has its rise
no doubt in the ponds in T. 26 N., R. 6 W.
but is fed almost entirely by springs break-
ing out on its banks. The banks for a Prai-
rie stream of its size, are high, being usually
from 15 to 25 feet high and composed of

free stone, slate stone and gravel. The bottom is generally narrow and subject to overflow, otherwise dry. The soil is a black sandy loam 2 1/2 feet deep based upon a strata of blue clay or slate stone from 2 1/2 to 3 feet thick, under which is generally to be found coarse gravel. The face of the country is undulating. Large sand & flint stone are found in this as well as every other part of the Grand Prairie, they are generally from 1 lb weight to 40 or 50 lbs. The stone quarry in Sec. 24 is apparently very extensive and of an excellent quality.

The mounds at section and quarter section corners are of cods (5 thicknesses) - 3 feet square at base, 4 feet high & 1 foot square at top, into each of which a round white Oak stake 3 feet long, 2 1/2 inches square is inserted, properly marked on all sides

I hereby certify that in pursuance of a contract with Micajah S. Williams, Surveyor General of the United States, for the States of Ohio and Indiana and the Territory of Michigan, bearing date the 16th of May 1834, and in strict conformity to the laws of the United States and the instructions of said Surveyor General, I have surveyed and subdivided into sections Township N^o 27 North, in Range N^o 7 West of the 2^d Principal Meridian in the State of Indiana.

And I do further certify that the foregoing are the true and original field notes of the said survey and subdivision executed as aforesaid.
